Products for sheet metal processing

Innovative tools

As far back as 1934, TRUMPF began manufacturing power tools for workmen on building sites and in job shops. Today, the TRUMPF Group employs more than 11.000 people in 26 countries and is a world leading manufacturer of production technology equipment – but we have stayed true to our roots: We continue to produce innovative tools for cutting, joining and beveling sheet metal in many industries. All machines are “made in Switzerland”.

Ideas for practical use.

Professional sheet metal workers all over the world rely on the user-friendly electrical- and cordless tools from TRUMPF. Our products convince not only for their high quality, but also by the latest technology. One example: The new battery generation relies on the current 10.8 V Li-Ion battery technology combined with an optimized battery gear head. Thus, the machines achieve an exceptionally long running time.

TRUMPF Li-Ion machines:

Power-Head-Technology

Latest Li-Ion battery technology.

TRUMPF C 160 slitting shears, S 160 and S 114 shears, PN 130 profile nibbler as well as DD 1010 drill driver are available with 10.8 V Li-Ion batteries with standard two 2 Ah batteries and optional 4 Ah battery. Combined with a battery-optimised aluminium gear head, the newest Li-Ion battery technology forms the basis of our new cordless tools. Many details in the gear head are tailored to the voltage of the battery technology and enable the 10.8 volt battery to produce output that is comparable to a 14.4 volt battery. Here is an example: In steel 400 N/mm² and a sheet thickness of 0.8 mm, about 100 meters can be cut using the S 160 shear with a 2 Ah battery. And with a 4 Ah battery, you can even double the run time.

Compact size – low weight.

The cordless shears and profile nibblers from TRUMPF are extremely light and their compact, ergonomic design increases operating comfort and provides the greatest possible mobility. A soft grip handle on the motor housing ensures a secure grip and low-vibration operation.

Staying cool.

Individual electrical cell monitoring in the battery unit and in the charger protects the battery from overload, overheating and deep discharge. The robust battery cells show a low energy drop and always remain cool. A built-in microprocessor analyses the battery data and controls an optimal charge and discharge process. The result: High efficiency combined with long battery service life.

Particular strengths:

- Power-Head-Technology: It's 10.8 V is as powerful as 14.4 V
- Light weight of machine and battery. For an unique operating comfort and highest mobility
- Constant-Control-Technology: constant work output and high cutting speed
- Fast and controlled charging procedure
- Individual cell monitoring. Protects against overload and overheating. For long battery service life
- Compatible: The 10.8 V Li-Ion batteries are combinable with all current TRUMPF battery machines and the charger of its voltage class

Power-Head-Technology Li-Ion Technology

Slitting shear TruTool C 160 Li-Ion battery 10.8 V

Slitting shear TruTool C 160 with chip clipper Li-Ion battery 10.8 V

Product details see page 18

Cutting performance per battery charge (mild steel 400 N/mm²)

- Accurate cuts, outstanding cutting quality
- Machine can be pulled out of the workpiece and restarted
- Rotatable cut guides, double the service life

Shear TruTool S 160 Li-Ion battery 10.8 V

Product details see page 30

Cutting performance per battery charge (mild steel 400 N/mm²)

- Burr-free cutting
- Clear view of the work surface and cutting line
- Minimum force required thanks to optimum cutting geometry
- Long tool life due to four reversible cutting blades

Shear TruTool S 114 Li-Ion battery 10.8 V

Product details see page 30

Cutting performance per battery charge (mild steel 400 N/mm²)

- Burr-free cutting
- For cutting tubes (flat trimming surfaces) that are placed close to the wall or ceiling
- Perfect cutting quality even across folded surfaces (i.e. spiral ducts)
- Trims C-L-U profiles and flat sheet metal

Profile nibbler TruTool PN 130 Li-Ion battery 10.8 V

Product details see page 52

Cutting performance per battery charge (mild steel 400 N/mm²)

- Outstanding mobility in the curves
- Distortion free cutting process
- 360° cutting directions to choose from
- Simple carrier replacement and integrated die

Power-Head-Technology Li-Ion Technology

Charger 100 – 240 V

2 Ah battery / 10.8 V

4 Ah battery / 10.8 V

- Charge status display: indicates current battery cell status
- Practical: battery is easy to attach to the machine
- Long run time Power-Head-Technology: with 10.8 V as powerful as 14.4 V
- Short charging times: fast and monitored charging
- Ergonomic: small size, light weight
- Individual cell monitoring: protects against overload and overheating. For long battery service life
- For even longer run times: the optional 4 Ah battery

Charger

Weight	420 g
Dimensions (L x W x H)	170 x 101 x 63 mm

Battery 10.8 V 2 Ah / 4 Ah

Battery	2 Ah	4 Ah
Battery voltage	10.8 V	10.8 V
Weight	230 g	400 g
Dimensions (L x W x H)	92 x 70 x 45 mm	92 x 70 x 65 mm

Drill driver TruTool DD 1010 Li-Ion battery 10.8 V

Drill driver TruTool DD 1010 Li-Ion battery 10.8 V with powerful 2-speed motor and extremely high operating comfort.

- Powerful 2-speed motor with quick-stop function
- Softgrip for a secure handling and low vibration work
- Integrated LED light to illuminate working area
- Extremely high operating comfort: balanced design and low weight
- High-quality Li-Ion technology for a long run time per battery charge

Product details see page 100

Extended Warranty:

5-year
warranty.

5-year warranty for your Power Tools.

TRUMPF Power Tools are “made in Switzerland” and meet high quality standards. Our products have been appreciated in a wide range of sectors for a number of years. You can always rely on our machines during your day-to-day operations. But there is more: you can extend your Power Tool warranty to 5 years. Completely free of charge.

All you have to do is register your Power Tool within 4 weeks of the purchase date.

Registration made simple.

The quickest and easiest way to obtain the 5-year warranty is online registration at www.warranty-powertools.trumpf.com. The 5-year warranty certificate for your registered machine will be emailed to you without delay. Obviously, it is also possible to register via fax or post. To do this, please use the registration form included with the supplied machine.

Terms and conditions of warranty.

The 5-year warranty includes damage due to material and/or manufacturing errors. At www.warranty-powertools.trumpf.com you will find detailed information on the extended warranty, the countries in which it is valid and what needs to be done in the event of an error.

TRUMPF Box:

Packaging with system.

The new TRUMPF boxes.

Particular strengths:

- High-quality and stable machine protection
- Even different sized TRUMPF boxes can be interconnected
- Special sealing technology enables the boxes to be individually opened when connected
- Several machines can be transported by simply connecting the TRUMPF boxes

TRUMPF Box

Systemised - the robust TRUMPF boxes

The new TRUMPF box system for TruTool Power Tools is stable and shock-proof. The boxes are made of 100% ABS plastic so they protect the tools against shocks, water spray, dust and other environmental influences.

Simple to connect and carry

The TRUMPF boxes – even different box sizes – can be stacked on top of one another and interconnected by a simple twist. This feature is particularly helpful for construction site operations. It enables you to save time as you can transport several tools simultaneously. The TruTool Power Tools can be transported practically and safely using the wide handle on the top of the boxes.

Greater flexibility

An additional advantage: thanks to the special seals, you can open each box individually and remove the machine. You can do this without removing the TRUMPF box from the connected stack.

No surprises

It is clear to you at all times which machine is contained in the TRUMPF box and order is ensured with immediate effect. This is thanks to the machine type marking located on the front and the side of the TRUMPF box. Special feature: you can also use the insert field for your own business card; so that it is evident on the construction site who the box belongs to.

Space-saving during storage

The TRUMPF boxes, which can be stacked flat and interconnected, reduce storage space requirements. You can save space and ensure user-friendly machine storage. Thanks to the standardised dimensions that are also compatible with EURO pallets, you can utilise your storage space in the best way possible and ensure order at the same time.

Personalised
Insert field for the business card

Simply connected
The stacked machines reduce space requirements. Even different sized boxes can be interconnected

No surprise

TRUMPF slitting shears:

Simply
better
cuts.

TRUMPF slitting shears are in use in a wide variety of industries, such as drywall construction, facade construction, ventilation and air channel construction, and chassis and aircraft manufacture. They feature both high speed and distortion free cutting, and it's especially simple to work with them. Thanks to the quick-release locking bolt, you can change the blade in only 15 seconds without using tools. The cutters are also easy to replace – you can even turn them to double their service life.

Fast and easy to handle.

The view of the workpiece is optimum, allowing you to cut along scribed lines, whether straight or curved, with precision. An integrated chip clipper allows you to pull the machine out of the workpiece at any time and restart the cut. This makes it the ideal tool for notching and interior cuts.

Particular strengths:

- Distortion free, high quality cutting
- Ideal for interior cutouts and notchings
- Accurate starting and cutting
- Machine can be pulled out of the workpiece and restarted
- No setup adjustments required
- High cutting speed
- The right blade for every application: for straight cuts, curved cuts, stainless steel and spiral duct
- Tool-free, fast cutter changes

TRUMPF shears:

Easier
in
turns.

TRUMPF offers sheet metalworkers, plumbers, electrical installers, sanitary installers, heating and air conditioning installers, and container and elevator builders the perfect shear for any application. You can be perfectly equipped for any ferrous or non-ferrous metal in different sheet thicknesses and for different applications.

Thanks to the field-tested cutting geometry of our machines you can cut with minimal damage to the surface of the material and with no thermal effects, whether you choose our electric or cordless version.

Clear visibility, clean curves.

With TRUMPF shears you can work accurately and easily in any position – even overhead – with a clear view of the cutting line, even in tight, difficult curves. These shears are designed for extreme flexibility in the turns. The cutting table and cutting table blades are fabricated with extreme care from high-tensile steel. The precision-guided reversible cutters offer long service life and are easy to replace.

Particular strengths:

- Clear view of the work surface and cutting line
- Quick, accurate cutting to scribed lines
- Best possible flexibility in curves
- Chip-free cutting permits operation in any position- even overhead
- Long tool life due to easily replaced reversible cutting blades
- Easily adjustable cutting clearance
- Minimum force required thanks to optimum cutting geometry

TRUMPF nibblers:

Versatile through thick and thin.

Whether working with sheet metal from 0.5 or 10 millimeter thickness, only TRUMPF always has the right nibbler for you. Each one operates free of distortion, emissions and sparks. Forward feed is unforced, even when cutting curves or corrugated profiles. For sheet metal work, coil cutting or container and tank assembly and disassembly – simply select one of our models.

Two tooling systems, one goal.

For steel, stainless or non-ferrous metals of up to 3.5 mm thickness, our nibblers have a patented hollow round punch. That makes them so versatile they can turn on a dime. They're perfect for interior cutouts or notching. You can also regulate the turning speed for cutting to scribed lines or templates. Better yet, no extra tools are needed for changing out the punches.

For sheets thicker than 3.5 mm, our nibblers use sturdy rectangular punches. They can handle your toughest cases: cutting across edges and beveled sheets, across welding seams, doubled sheets and corrugated profiles. For cutting in cramped quarters or awkward locations, TRUMPF nibblers can be adjusted to 3 or more cutting directions, usually without additional tools.

Round or squared punch: either system works with an impact cut. The chips fall downwards and can be caught by a chip bag. So you always have a clear view of the work surface. At TRUMPF, even the practical details are taken into account.

Particular strengths:

- Distortion free
- Automatic feed, easy of handling
- Spark-free
- Punches can be reground several times

Up to 3.5 mm sheet thickness (400 N/mm² steel)

- Hollow round punch: 360° turns on the spot; highest possible versatility
- Ideal for interior cutouts and notching
- Burr-free cuts
- With speed regulator for working to scribed lines or templates
- Tool-free tool changing (dies and punches)

Over 3.5 mm sheet thickness (400 N/mm² steel)

- Rectangular punch: durable and regrindable, yet leaves smallest possible cutting track
- Multiple cutting directions with tool-free adjustment
- Reverse cutting provides ease and safety when cutting coil
- Ideal for cuts across edges, welding seams or doubled sheets

TRUMPF profile nibblers:

Not just
for
profiles.

High performance in the field.

Profile nibblers are easy to maneuver, even in cramped or hard-to-reach places. Their high curve and profile flexibility means you can change the cutting direction at any time. And they work quickly and with little vibration. Like all our nibblers, they cut without distortion. The punch and the die carrier can be changed without using tools. The impact cut with downward chip ejection means you always have a clear view of the work surface.

TRUMPF has developed the ideal tools for sheet metal workers, plumbers and for roofing and siding construction. With our profile nibblers you always get visibly high-quality edges, without corrosion or oxide formation. Whether you are using steel or aluminum, cutting trapezoidal or corrugated profiles, or cutting holes, separating flat sheets, or even working with doubled sheets, our profile nibblers will do the job.

Particular strengths:

- Universally applicable for trapezoidal, profile and corrugated sheet
- Ideal for C, L and U profiles
- Distortion free cutting process
- High curve and profile flexibility
- Change cutting directions at any time
- Tool-free changing of punches and die carriers
- No oxide formation on the cut edge

Cutting

Profile nibblers (power tools)

TruTool PN 200

- With short tool - for trapezoidal sheet up to 85 mm deep and for C, L, U- profiles
- Powerful machine - provides trouble-free cutting of double sheet metal
- Fast change of cutting direction - can rotate 360°
- Tool-free tool, die and cutting direction change

TRUMPF panel cutter:

Efficient
cutting
easy and precise.

The TPC 165 Panel Cutter from TRUMPF is the perfect solution for cutting sandwich panels. It can cut panels up to a maximum thickness of 165 mm in one operation, regardless of whether the panel surface is flat, trapezoidal or corrugated.

Unique: The immersion mechanism.

With a 90 degree adjustable blade, you can easily and quickly produce right-angle cutouts. Another plus: As a result of its immersion mechanism, you can start at any location on the panel without a starting drill hole. This enables you to easily produce accurately dimensioned interior cutouts – even on mounted panels.

Very simply: perfect cuts.

The provided lever allows you to loosen the blade and adjust it to the desired position. With the blade fixture, as well as the 13 possible positions, you can easily select the cutting depth. Easy-to-see guide marks facilitate precise cuts along the entire cutting line with a consistent and precise cutting depth. The optional guide rail is ideal for precise, straight cuts and makes the machine easy to guide, regardless of the sandwich panel's surface material, even if the spacing between the individual segments is very large. Using guide rails prevents scratches on the sheet metal.

Particular strenghts:

- Precisely dimensioned, right-angle cutouts
- Interior cutouts and notches without starting drill holes
- Work completed in one operation, no finishing work needed
- Cuts pre-assembled panels
- Easy, non-fatigue operation

Cutting

Panel cutter (power tools)

TruTool TPC 165

- Precisely dimensioned, right-angle cutouts
- Interior cutouts and notches without starting drill holes
- High working speed
- Work completed in one operation, no finishing work needed
- Cuts pre-assembled panels
- Low machine weight
- Guide rails for highly precise cutouts

TRUMPF seam lockers:

Sealed
in no
time.

Whether working with standing, angular or Pittsburgh seams, TRUMPF seam lockers offer fast, reliable and portable sealing for assembly at the job site. If you are in the HVAC, roofing & siding, general construction or metal fabricating field, TRUMPF has the right tool for your job.

Perfect for Pittsburgh seams.

So you can find exactly the right machine for your sheet metal thickness and flange height, TRUMPF offers four different TruTool models: F 300, F 301, F 305 and F 140. They all use the fast, quiet roll/glide process and feature a self-powered drive, and automatic adjustment to your material thickness and seam height. The process gives you a consistent, tight seam.

For angular and standing seams.

With the portable TruTool F 125, you can close any standing seam – even in tight corners and angles. This is ideal not only for visible areas; it's also gentle on coatings. You can adjust the tool to your sheet metal thickness without using tools. For variable sheet thicknesses, a spring-loaded hammer ensures even closure. So you get the same good result every time.

Particular strengths:

- Closure of Pittsburgh seams (except for the TruTool F 125)
- Cost-effective seam closure at the installation site
- Automatic feed produces consistent seam results
- Automatic adjustment to sheet thickness (except for the TruTool F 125)
- Quick, consistently tight seam closure
- Quiet, vibration-free operation

Fastening

Seam lockers (power tools)

TruTool F 300

- Closes Pittsburgh seams on straight and radius duct from 0.75 mm to 1.25 mm sheet
- No refitting when processing formed or folded pieces

TruTool F 300 with 1400 W motor

- With more powerful drive and higher working speed
- Closes Pittsburgh seams on straight and radius duct from 0.75 mm to 1.25 mm sheet
- No refitting when processing formed or folded pieces

TruTool F 140

- Closes Pittsburgh seams on straight and radius duct up to 1.4 mm sheet thickness
- High performance on stainless steel applications
- No refitting when processing formed or folded pieces
- Electronic speed controller for optimal working speed

TruTool F 140 for fan blower

- Especially designed for fan blowers and narrow radii
- Adjustment for short or long flange height
- Consistently high seam quality for curved applications
- Electronic speed controller for optimal working speed

TRUMPF power fasteners:

Fasten
faster
and cheaper.

Fastening

Whether in HVAC or in container and equipment construction, joining is probably the simplest and most cost-effective way to connect two metal parts. The TRUMPF power fastener uses a unique cold-forming technology to punch a small dimple into both sheets and immediately you have an astonishingly stable, long-lasting connection. No screws, no rivets, no emissions, no preparation or cleanup work.

Perfect: the tilting arm.

For special applications like all-around joining, such as in duct construction, the TRUMPF TruTool TF 350 power fastener has a tilting arm. That allows you simply to open the upper tool. It really doesn't get any easier.

Particular strengths:

- For form-fitting, corrosion-resistant joining
- Replaces connecting fasteners like rivets and screws
- Unbeatably fast process
- Minimal setup time
- Joining of different materials, as well as coated and uncoated workpieces
- Can be used on construction sites or on the assembly line

Fastening

Power fasteners (power tools)

TruTool TF 350

- Rapid stroke rate – up to two joining points per second
- High tool life with correspondingly high efficiency
- Powerful 1400 Watt motor
- Can be ordered with or without tool

TRUMPF deburrers:

Save time –
in a
single step.

In the construction of machines, rail cars and ships, TRUMPF deburrers are just as established as in steel working, job shops for sheet metalworking or in other metalworking shops. The TruTool TKA let you produce either straight bevelled or radius edges. You can also break or round sharp edges or make flawless bevels at a variety of angles. And you can do all that without any refinishing, burr- and oxide-free, with precision and high quality you can easily see. For radii and interior contours, cut ends or for welding preparation.

The right tool for every angle.

We offer a large variety of standard cutter mounts that enable you to produce angles from 15° up to 60°. Our standard cutter mount product line also includes a 0° cutter mount that can be used for cutting short edges and a plasma cutter mount for rounding off plasma-cut edges.

And when you want to make rounded edges with 2, 3 or 4 mm radii, the R cutter mount is the perfect accessory.

Particular strengths:

- Fast, emission-free process
- Clean, oxide-free edge surfaces
- Accurate, constant edge quality in one step
- Ideal for complex workpieces as well as for interior contours, bores and tubes
- Tool-free adjustment of the bevel height
- No sparks
- Can handle small parts (with workstation)

Bevelling Deburrers (power tools)

TruTool TKA 500

- 3-cutter tool system
- 30°, 45° and 60° as well radius edges
- Optional cutter mounts for 15° – 55° available

TRUMPF bevellers:

For high-quality welding seams.

TRUMPF bevellers have long proven themselves in industries where fast, reliable welding preparation is an essential part of operations. The TruTool TKF-series bevellers are used on flat sheet, pipe and tubing applications to produce clean, even, oxide-free, metallurgically clean K, V, X and Y edges. Bevel quality is maintained even on curved edges and inside cutouts.

Unique: with automatic forward feed.

The TruTool TKF 1500 and TKF 2000 models also come with automatic forward feed. Thanks to the automatic forward feed, they both offer vibration-free operation without much effort. After the machine is applied to the sheet metal, it runs on its own and only needs to be monitored during processing.

Fast and accurate.

The process is not only fast and economical, it's also very precise. You can prepare a high-quality welding seam in a single step with no need for refinishing. Surface scoring of the workpiece is negligible. The cutters have two cutting edges, and can be reground numerous times – and using the quick-release fastener means you can replace it in a snap.

Particular strengths:

- Emission- and oxide-free edges
- Can be used on different workpiece contours, even on tubes
- Welding seam preparation in a single step
- For K, V, X and Y edges, metallically blank
- High working speed
- Different angle adjustments
- Two models with automatic forward feed

Bevelling

Bevellers (power tools)

TruTool TKF 700

- No extra tools required to adjust the bevel height and sheet thickness
- Mounting brackets for bevel angles of 30°, 37.5° or 45°
- Light weight at 5.4 kg
- Quick release lock allows three defined directions for tool carrier setting
- Processes pipe with a minimum inside diameter of 80 mm
- Bevels inside cutouts starting 90 mm diameter and curved edges with a minimum radius of 40 mm

TruTool TKF 2000

- For curved edges with radii and inner cut-outs
- Continuous self-feed and adjustable feed-speed; machine runs alone and you only have to keep an eye on it
- No extra tools required to adjust the sheet thickness
- Bevelling angle easily adjustable from 20° to 55°
Conversion into automatic forward feed is easily possible

TRUMPF Drill driver:

Handy
and
light.

The new battery drill driver from TRUMPF is distinguished above all by its ergonomically correct design and superb operating convenience. It draws power from a modern 10.8 volt Li-Ion battery with 2 Ah capacity which ensures a long duty cycle. Batteries as well charger are also used in other TRUMPF Li-Ion battery machines as slitting shears, shears and profile nibbler of the 10.8 V series. Professional craftsmen can use this machine to drill starting holes in steel sheets and, in just the same way, to drive screws and drill holes in a variety of other materials.

Excellent performance.

Equipped with a two speed motor, this high-quality drill driver can achieve 15 or 30 newton meters in both the clockwise and counterclockwise directions. Maximum speed is 1,450 revolutions per minute. To set the power level correctly for screw driving and drilling, TRUMPF has fitted this new industrial-quality tool with 17 torque settings and an additional drilling step.

The high quality of the TruTool DD 1010, is reflected in the performance data and equally in its convenient operation. The drill driver lies comfortably in the hand and features a soft grip with ideal grip circumference. Here the tool – including the rechargeable battery – weighs only 1.1 kilograms and because of that, makes for work at low fatigue levels.

Particular strenghts:

- Powerful 2-speed motor
- One-hand operated switch
- Extremely high operating comfort, balanced design and low weight
- For start holes, drilling and screwing
- Compatible: 10.8 V Li-Ion battery and charger are identical with the current 10.8 V Li-Ion TRUMPF battery machines

Drilling

Drill driver (cordless tool)

TruTool DD 1010 Li-Ion battery 10.8 V

- Softgrip for a secure handling and low vibration work
- Integrated LED light to illuminate working area
- Stable, anti-tilt stand
- High quality Li-Ion technology for long run time per battery charge

TruTool DD 1010 Solo Li-Ion battery 10.8 V

- Solo version: Machine without battery and charger
- Softgrip for a secure handling and low vibration work
- Integrated LED light to illuminate working area
- Stable, anti-tilt stand
- High quality Li-Ion technology for long run time per battery charge

TRUMPF slat cleaner:

The specialist for clean support slats.

If you cut sheet metal with a flatbed laser machine, now you can save up to 75% of the cost of support slats. The TRUMPF TruTool TSC 100 slat cleaner cleans slag from your slats – over and over, and much more quickly than cleaning by hand. So you can use your support slats significantly longer.

For high quality and reliable process.

Clean support slats boost production reliability, improving the quality of the finished parts. The slat cleaner automatically adapts to different slag thicknesses and the operator can move the tool up to the pallet frame.

The slat cleaner can be used for the most diverse materials. Even stainless steel slag is reliably removed so that even heavily soiled slats do not represent a problem. Another bonus is that the slat cleaner is able to clean selectively - in other words, it can be used on any specific area and then removed. TruTool 100 can quickly and reliably clean almost all conventional flatbed laser machines.

Particular strengths:

- Repeated cleaning of support slats possible
- Can be operated by just one person
- Suitable for the most diverse materials, especially for stainless steel
- Reliable and quiet
- Simple, trouble-free operation
- Cost-effective operation

Special machines

Slat cleaner (power tools)

TruTool TSC 100

- Can be operated by just one person
- High working speed
- Adapts automatically to different slag thicknesses
- On flatbed laser machines with a pallet changer, cleaning takes place while production is running.

Noise/Vibrations Information

Measured values determined according to EN 60745

The vibration emission level given in this information sheet has been measured in accordance with a standardised test given in EN 60745 and may be used to compare one tool with another. It may be used for a preliminary assessment of exposure.

The declared vibration emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or poorly maintained, the vibration emission may differ. This may significantly increase the exposure level over the total working period. An estimation of the level of exposure to vibration should also take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period.

Identify additional safety measures to protect the operator from the effects of vibration such as: maintain the tool and the accessories, keep the hands warm, organisation of work patterns.

General terms and conditions

Delivery terms

For the delivery of the products listed in this brochure, the relevant valid terms and conditions of delivery are standard.

Warranty

For TRUMPF electric and cordless power tools, the term of liability is 12 months as of the date of invoice. Damages that are traced back to natural wear and tear, overstress or improper use of the machine are excluded from the warranty. Damages that occur due to material or manufacturing defects or errors will be handled by a replacement delivery or repaired free of charge. Claims can only be accepted if the device is sent back to your TRUMPF dealer without having been disassembled.

ISO certification

All electric and cordless-operated tools produced in our production facilities are certified according to ISO 9001.

Nominal voltages

In general, the corresponding country models are available for all machines. Please contact your TRUMPF sales office for additional details.

Subject to changes

We reserve the right to change data as well as correct mistakes and print errors; liability for such is excluded. Technical data, in particular, are subject to change without prior notification. Individual features may differ depending on country-specific issues.

CE conformity

All electric and cordless-operated tools in this catalogue adhere to the provisions of the respectively relevant EU directives.

Service

TRUMPF offers worldwide repair service centers. Please contact your regional sales office so that repairs can be made by our trained specialists.

Operating manuals as well as spare parts lists are delivered along with the machines. If these documents are lost, replacements are available for download at www.trumpf-powertools.com.

Please use only original spare parts as well as original accessories from TRUMPF. This guarantees trouble-free machine use and, in case of a claim, acceptance of your warranty claim

TRUMPF is certified according to ISO 9001:2008
(further informations see www.trumpf.com/en/company/quality)
